

ALIBABA CLOUD FOR LOGISTICS

The logistics industry spans multiple segments including, warehousing, transportation, customs operations, and distribution, and is closely linked to industries such as retail and finance. To support these industries, Alibaba Cloud offers a globally distributed, high-performance, and reliable cloud infrastructure as well as the ecosystem from other Alibaba Group businesses. This includes Alibaba Group's global leading e-commerce capabilities, Ant Group's payment capabilities, and Cainiao's global logistics network.

Alibaba Cloud leverages advanced AI and data intelligence technologies and integrated communication capabilities to support secure, compliant, reliable, and elastic infrastructure of computing, storage, and cross-border networking, and provide global customers with intelligent, efficient, and stable logistics solutions.

These solutions break the bottlenecks of each segment of logistics. In doing so, Alibaba Cloud helps you integrate with local industry ecosystems and meet various business needs of resources, products, and business. All while achieving an optimal cost/performance ratio.

CAINIAO: CROSS-BORDER LOGISTICS CAPABILITIES CENTERING AROUND THE NETHERLANDS, BELGIUM, AND LUXEMBOURG

Following the relocation of its core system to Alibaba Cloud, the Cainiao logistics network platform now has the capability of handling one billion packages per day. This is a breakthrough in the technical limits of the logistics industry.

CROSS-REGION GLOBAL NETWORK CONNECTION

Alibaba Cloud provides fast and cost-effective networking services for multinational enterprises to build cross-region network connections. We ensure cross-region interconnections are legal and compliant.

Fast Deployment

Set up a multi-region networking environment in 4 easy steps and within 5 minutes.

Cost Effective

The cost depends on the demands of your network needs. No extra charges are required.

Superior Speed

Significantly reduces network latency. It improves business processes and overall communication.

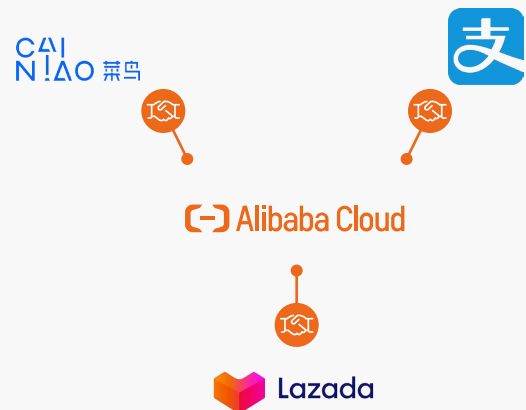

China Gateway

As a leading cloud provider in China, we provide reliable network connection between your region and mainland China.
