Overview

Documentation 

Pricing 

Quickstart 

Simple Application Server offers an all-in-one solution to launch and manage your applications, set up domain name resolutions, and build, monitor, maintain your websites with just a few clicks.

It makes private server building much easier, and it is the best way for beginners to get started with cloud computing.

Benefits

Deploy in Seconds

Pre-installed software including Image Application and OS Image means you can get started quickly.

Simple and Easy-to-use Console

One-stop management simplifies operations including domain name resolution, application deployment and server management.

High Performance

SSD cloud disks provide high throughput and high IO for storage, and high-speed Intel Xeon processors reduce network latency by a third.

Predictable Billing

Product packages are strictly priced on a monthly basis, so you pay a monthly fee at a fixed price.

Customer Scenarios

Customers can build the applications below in just three minutes with three simple steps:

- » Creating small websites and personal blogs
- » Creating a learning environment
- » Running web programs
- » Building e-commerce websites

Storage Flexibility

Computation

Connectivity

Remote Management

Established in September 2009, Alibaba Cloud is the cloud computing arm of Alibaba Group and develops highly scalable platforms for cloud computing and data management.
